

**Working Prototype Known Problems Report**  
**PickUp**  
**Team PickUp**  
**Date: June 5th, 2018**

List of functions not working correctly:

- Map not showing team games(not implemented, caused bugs)
  - To fix: Read more API documentation
- trivial spotted errors throughout, like invalid DOM names, same key errors
- XML error on logout, and various other pages
  - Unknown
- Extreme minimizing causes UI issues
  - To fix: implement modifications for UI for small screens
- Some profile pics are stretched
  - To fix: enforce picture upload dimensions or crop
- 404 temporarily when signing in/loading
  - To fix: may require reworking the entire routing
- Home page not updating current player/ current game stats
- Sign up on home page doesn't redirect to Sign in
  - history props wasn't passed in correctly
- details is incomplete for Games page, and doesn't exist for Team Games
  - Not really a bug, just not implemented
- Randomly logs people out
  - Might have something to do with the routes page not verifying user correctly, or  
props not being passed down correctly
- Google Maps API key may create errors from time to time

- To fix: Create new API key and insert it into the code.
